**(-) Families and Households:**

The composition of the **39,475** families who reside in the study area is shown in the table below. Families are groups of related people who live together, whereas households refer to the person or group of people living in any one housing unit. Generally, households that do not contain a family are made up of unrelated people living together (eg, roommates) or people living alone. While it is possible for two families to share a household, the difference between the number of households and the number of families in an area shows, approximately, the number of non-family households in a place.

### (-) Endnotes:

Calculations presented here were performed by staff at The Reinvestment Fund and are based on public and proprietary data sources that have been licensed for use in PolicyMap.

Depending on the type of size of the area selected for this report, the above values capture data for the block groups, tracts, counties, etc, in which at least 50% of their areas are contained. If this report is run for a zip code, some data will be unavailable, as zip code values for some topics are not available through the Census.

The source of crime data in the tables presented here is Federal Bureau of Investigation's Uniform Crime Reporting (UCR) Program, which compiles standardized incident reports from local law enforcement agencies in order to produce reliable, uniform, and national crime data. The UCR Program collects data on known offenses and persons arrested by law enforcement agencies. For details on this dataset, see the related entry for [FBI Uniform Crime Reports](#) in the Data Directory. Crime data in this report is not summed or aggregated, but rather listed for each of the complete areas within the study area for which crime is reported.

For the separate Employment and Crime Sections in this report, only locations for which data are available are included in the tables. If the section does not include information, no data was available for any of the locations or component parts of the area you requested for this report.

Please note that reports for Congressional Districts and for metro areas may be showing aggregations of smaller geographies, such as block groups or Census tracts. Due to the change in boundaries between 2000 and 2010, 2000 data may not be available for reports for these geographies.

PolicyMap's [Terms of Use](#) apply to the creation and use of this report.
