

SURVEY OF PROFESSIONAL FORECASTERS

Release Date: February 13, 2006

FIRST QUARTER 2006

A Rebound Is Expected in the First Quarter

The U.S. economy will grow strongly in the first quarter, following unexpectedly slow growth in last year's fourth quarter, according to 53 forecasters surveyed by the Federal Reserve Bank of Philadelphia. The forecasters now project first-quarter growth at an annual rate of 4.4 percent, marking an upward revision from their previous estimate of 3.7 percent in the survey of three months ago. Second-quarter growth is seen at an annual rate of 3.4 percent, up 0.1 percentage point from the previous estimate. On an annual basis, the forecasters project steady year-over-year growth at 3.2 percent in each of the next two years. Interestingly, these rates are the same as the forecasters' new estimate of average annual growth over the next 10 years, suggesting that they see little in the way of transitional dynamics in the U.S. economy over the medium and long run.

With their call for relatively steady growth, the forecasters see pretty steady performance in the labor market. The unemployment rate is seen holding constant at 4.8 percent over the four quarters of this year and rising just a bit, to 4.9 percent, in 2007. Previously, the forecasters expected unemployment to average 4.9 percent in 2006. On the jobs front, the forecasters see nonfarm payroll employment increasing at a rate of 188,000 jobs per month this quarter, down marginally from their previous estimate of 199,000. For the year, the forecasters see payrolls increasing at a rate of 165,000 per month, virtually unchanged from their previous estimate of 172,000. Job gains in 2007 are seen averaging 149,000 per month, as the table below shows.

The following table compares forecasts for selected variables from the current survey with those from three months ago.

	Real GDP (%)		Unemployment Rate (%)		Change in Payrolls (000s/month)	
	Previous	New	Previous	New	Previous	New
<i>Quarterly data:</i>						
2006: Q1	3.7	4.4	5.0	4.8	199.0	187.7
Q2	3.3	3.4	4.9	4.8	184.0	178.7
Q3	3.2	3.0	4.9	4.8	182.7	157.8
Q4	3.2	3.2	5.0	4.8	147.3	140.8
2007: Q1	N.A.	3.3	N.A.	4.9	N.A.	151.3
<i>Annual average data:</i>						
2006	3.4	3.2	4.9	4.8	172.1	165.4
2007	N.A.	3.2	N.A.	4.9	N.A.	149.0

Little Risk of Rising Inflation

Beyond the very short term, the forecasters see little threat of accelerating inflation. They predict CPI inflation at an annual rate of 2.0 percent in the current quarter and 2.5 percent in each of the following two quarters. On a fourth-quarter over fourth-quarter basis, CPI inflation is forecast at 2.4 percent in 2006 and 2.3 percent in 2007. Over the longer run, the forecasters see inflation averaging 2.5 percent over the next 10 years, the same rate they have been expecting since the surveys conducted in the late 1990s.

In recent surveys, we have been asking the forecasters for additional details on their expectations for inflation, in an attempt to see if there is any horizon over which the forecasters are worried about inflation. In answer to these special questions, the forecasters report that they expect inflation in 2008 to average 2.3 percent, the same rate they expect in 2007. Over the next five years, inflation will average 2.5 percent, the same rate the forecasters expect over the 10-year horizon, suggesting that no acceleration is seen over the second five-year period of the 10-year horizon. These forecasts, summarized in the table below, suggest that beyond a short-term transitional period, the forecasters are not worried about accelerating inflation.

Median Forecasts for the Trajectory of CPI Inflation Over the Next 10 Years (%) First Quarter 2006 Survey

Quarterly data:

2006:Q1	2.0
Q2	2.5
Q3	2.5
Q4	2.4
2007:Q1	2.3

Annual average data:

2006	2.4
2007	2.3
2008	2.3

Long-Term (Annual Average):

2006-2010	2.50
2011-2015	2.50
2006-2015	2.50

Forecasters Trim Estimates for Long-Run Growth in Output and Productivity

In first-quarter surveys, we ask the forecasters for their long-run projections for an expanded set of variables, including growth in output and productivity, as well as returns on financial assets. As the table below shows, the forecasters have trimmed the long-run outlook for real GDP growth and growth in productivity, but only by a very small amount. Over the next 10 years, the forecasters think real GDP will grow at an annual rate of 3.20 percent. Part of that growth comes from a more productive labor force. The forecasters see labor productivity growing over the next 10 years at an annual rate of 2.44 percent. Over the next 10 years, equities (as measured by the S&P 500 index) will return 7 percent per year and 10-year Treasury bonds will return 5 percent, estimates that are unchanged from the survey conducted last year. Three-month Treasury bills will, in contrast, return a bit more than the forecasters previously thought. They now think bills will return 4.25 percent per year over the next 10 years, up from their previous estimate of 3.70 percent.

Long-Term (10-year) Forecasts (%)

	<i>First Quarter 2005</i>	<i>Current Survey</i>
<i>Real GDP Growth</i>	3.30	3.20
<i>Productivity Growth</i>	2.50	2.44
<i>Stock Returns (S&P 500)</i>	7.00	7.00
<i>Bond Returns (10-year)</i>	5.00	5.00
<i>Bill Returns (3-month)</i>	3.70	4.25

The Federal Reserve Bank of Philadelphia thanks the following forecasters for their participation in our surveys:

Joseph T. Abate, Lehman Brothers; **Scott Anderson**, Wells Fargo and Company; **Robert J. Barbera**, ITG; **David W. Berson**, Fannie Mae; **George Brinton**, Brinton Economics, Inc.; **Joseph Carson**, Alliance Capital Management; **Gary Ciminero**, CFA, Independent Economic Advisory; **Richard DeKaser**, National City Corporation; **Rajeev Dhawan**, Georgia State University; **Doug Duncan**, Mortgage Bankers Association; **Michael R. Englund**, Action Economics, LLC; **Gerard F. Fuda**, Independent Economist; **Stephen Gallagher**, Societe Generale; **James Glassman**, JP Morgan Chase & Co.; **Global Insight**; **Keith Hembre**, First American Funds; **David Huether**, National Association of Manufacturers; **William B. Hummer**, Wayne Hummer Investments; **Saul Hymans**, **Joan Crary**, and **Janet Wolfe**, RSQE, The University of Michigan; **Fred Joutz**, Benchmark Forecasts and Research Program on Forecasting, George Washington University; **Kurt Karl**, Swiss Re; **Dr. Irwin Kellner**, Hofstra University/MarketWatch/North Fork Bank; **Thomas Lam**, UOB Group; **L. Douglas Lee**, Economics from Washington; **Joseph Liro**, Stone & McCarthy Research Associates; **John Lonski**, Moody's Investors Service; **Dean Maki**, Barclays Capital; **Edward F. McKelvey**, Goldman Sachs; **Jim Meil**, Eaton Corporation; **Anthony Metz**, Pareto Optimal Economics; **Michael Moran**, Daiwa Securities America; **Joel L. Naroff**, Naroff Economic Advisors; **Mark Nielson, Ph.D.**, MacroEcon Global Advisors; **Michael P. Niemira**, International Council of Shopping Centers; **Martin A. Regalia**, U.S. Chamber of Commerce; **David Resler**, Nomura Securities International, Inc.; **David Rosenberg**, Merrill Lynch; **John Ryding**, Bear, Stearns, and Company, Inc.; **David F. Seiders**, National Association of Home Builders; **Xiaobing Shuai, Ph.D.**, Chmura Economics & Analytics; **Sean M. Snaith, Ph.D.**, University of the Pacific; **Constantine G. Soras, Ph.D.**, Verizon Communications; **Neal Soss**, Credit Suisse First Boston; **Stephen Stanley**, RBS Greenwich Capital; **Susan M. Sterne**, Economic Analysis Associates, Inc.; **Thomas Kevin Swift**, American Chemistry Council; **David Teolis**, General Motors Corporation; **Lea Tyler**, Oxford Economics USA, Inc.; **Albert M. Wojnilower**; **Richard Yamarone**, Argus Research Group; **Mark Zandi**, Economy.com; **Ellen Beeson Zentner**, Bank of Tokyo-Mitsubishi UFJ, Ltd.

This is a partial list of participants. We also thank those who wish to remain anonymous.

The Philadelphia Fed's Survey of Professional Forecasters was formerly conducted by the American Statistical Association (ASA) and the National Bureau of Economic Research (NBER) and was known as the ASA/NBER survey. The survey, which began in 1968, is conducted each quarter. The Federal Reserve Bank of Philadelphia, in cooperation with the NBER, assumed responsibility for the survey in June 1990.

For further information about the Survey of Professional Forecasters, contact:
 Tom Stark, Federal Reserve Bank of Philadelphia
 Ten Independence Mall, Philadelphia, PA 19106 email: PHIL.SPF@phil.frb.org

To subscribe to the survey, go to www.philadelphiefed.org/forms/orderform.htm. This three-page writeup contains partial results of the survey. More detailed tables are available. These tables can be accessed on the Internet at: <http://www.philadelphiefed.org/econ/spf/index.html>.

SURVEY OF PROFESSIONAL FORECASTERS

First Quarter 2006

Tables

Note: Data in these tables listed as "actual" are the data that were available to the forecasters when they were sent the survey questionnaire on January 27; the tables do not reflect subsequent revisions to the data. All forecasts were received on or before February 8, 2006. **Note on forecasts for corporate profits:** This is the first survey to incorporate forecasts for corporate profits after tax *with* inventory valuation adjustment (IVA) and capital consumption adjustment (CCAdj). Previous surveys used the after-tax measure without these adjustments.
