### INSTRUCTIONS

Please e-mail this survey to phil.spf@phil.frb.org no later than **February 7, 2011**. Questions about the survey should be directed to Tom Stark at (215) 574-6436 or John Chew at (215) 574-3814.

Recent data for the variables to be forecast are given on an attached sheet, with figures for the most recent quarter printed in the first column of the table on the next page (there are figures for the past year listed as well). If you use these figures in preparing your forecast, leave them as they are; otherwise, insert your own figures.

For monthly data, use quarterly averages.

For some variables, you may record your responses in growth rates or levels, but you must provide a level for **2010:Q4** for quarterly data and for **2010** annual data. These variables are denoted with a blank cell under the column header "L/G"; type "L" if you forecast in levels, or "G" if you forecast in growth rates. Please be consistent--if you forecast in growth rates for quarterly data, also forecast in growth rates for annual data.

See the information in the write-up "Data Sources and Descriptions" for details on all the variables.
