Technical Notes

Due to the lack of data for most variables during the federal government shutdown, historical levels for the third quarter of 2025 and October 2025 were not available to panelists. We asked the forecasters to provide their projections for these historical values, but many forecasters did not. Therefore, growth rates using the third quarter 2025 or October 2025 value are based on a small sample.

This news release reports the median value across the 21 forecasters on the survey's panel. All forecasts were submitted on or before December 5, 2025.

The Philadelphia Fed's Livingston Survey is the oldest survey of economists' expectations. The survey was started in 1946 by the late columnist Joseph A. Livingston. It summarizes the forecasts of economists from industry, government, banking, and academia. It is published twice a year, in June and December.
