“Keys to Financial Success” Course
Program Overview

“Sound financial decisions are critical not only to the prosperity and financial security of individuals, but also to the growth and efficiency of our overall economy. Meeting the challenge of operating in today’s economy is much easier if we have a working knowledge of how our economy functions and how it affects us. That is why economic education is such a critical component of the Federal Reserve’s mission.” Federal Reserve Chairman Ben Bernanke, in a message concerning the importance of the Federal Reserve System’s economic and personal financial education efforts

The “Keys to Financial Success” personal finance curriculum empowers students and teaches them about personal finance. The “Keys” program covers five main themes, which provide a well-rounded and in-depth personal finance curriculum for secondary level students. The curriculum provides a strong foundation for delivering the knowledge necessary for students to succeed in life.

The “Keys” program is currently being successfully taught in about 70 high schools in New Jersey, Pennsylvania, and Delaware. These schools deliver the curriculum to over 2,800 students each year.

The “Keys” program provides a good way for schools to quickly and inexpensively establish a semester-long personal finance course. The curriculum provides a “Day 1 to Day 90” outline for the successful implementation of the personal finance course. Block and full academic year configurations are available. The course does not require the purchase of any textbooks.

Parents have expressed regret that they did not have a course like this in high school. One parent said, “This could have saved me a lot of grief.”

On an end-of-the-course survey, over 90 percent of the students said that after taking the course, they were more aware of the choices they had in regard to their income and that they had a better understanding of the costs and benefits of those choices and how critical long-term planning is.

Donna Mitchell, principal of Middletown High School, said, “We’re excited about offering the Keys to Financial Success class. Students are encountering real life financial situations for life after high school. They are excited and greatly interested in the content of the course.”

Participating schools commit to offering the course at least once per academic year and appoint at least one teacher to be trained in a free week-long summer course. (All teachers who teach the course are expected to receive the training prior to teaching the course for the first time.) Schools are provided, free of charge, a complete curriculum binder describing the day-to-day operation of the course as well as copies of the National Council on Economic Education’s Financial Fitness for Life and Learning, Earning, and Investing lessons.

If you are ready to make a commitment to a successful program and receive the training and materials needed to implement the “Keys” program, please contact:

Curriculum Summary:
The “Keys” curriculum focuses on five themes. The course gives students the knowledge to make well-informed personal financial decisions. The five themes are:

- Goals and Decision Making
- Career Research and Planning
- Money Management for Budgeting, Banking Services, Savings and Investing plus Credit
- Consumer Skills (emphasizing Housing and Transportation)
- Risk Protection

“Keys” Support:
“Keys” teachers are invited to attend dinner meetings at the Federal Reserve Bank of Philadelphia on two occasions during the school year to receive updated curriculum items and listen to expert speakers on various personal finance topics.
