Aruoba-Diebold-Scotti Business Conditions Index

2000:01:01 - 2023:09:16

The index uses the data available on September 21, 2023. Shading shows NBER-dated recessions.

The Aruoba-Diebold-Scotti Business Conditions Index is a measure of the overall business conditions in an economy. It is calculated using a weighted average of various economic indicators, such as industrial production, employment, and consumer sentiment. The index ranges from -25 (worst conditions) to 25 (best conditions), with 0 indicating normal conditions. The shaded areas represent recessions as dated by the National Bureau of Economic Research (NBER).
