INSTRUCTIONS

Please e-mail this survey to phil.spf@phil.frb.org no later than **February 8, 2010**. Questions about the survey should be directed to Tom Stark at (215) 574-6436 or John Chew at (215) 574-3814.

Recent data for the variables to be forecast are given on an attached sheet, with figures for the most recent quarter printed in the first column of the table on the next page (there are figures for the past year listed as well). If you use these figures in preparing your forecast, leave them as they are; otherwise, insert your own figures.

For monthly data, use quarterly averages.

For some variables, you may record your responses in growth rates or levels, but you must provide a level for **2009:Q4** for quarterly data and for **2009** annual data. These variables are denoted with a blank cell under the column header "L/G"; type "L" if you forecast in levels, or "G" if you forecast in growth rates. Please be consistent--if you forecast in growth rates for quarterly data, also forecast in growth rates for annual data.

See the information in the write-up "Data Sources and Descriptions" for details on all the variables.

Section 6. Probability of Decline in Real GDP (chain-weighted)

Indicate the probability you would attach to a decline in the level of real GDP (chain-weighted basis, seasonally adjusted) in the next five quarters. Write in a figure that may range from 0 to 100 in each of the cells (100 means a decline in the given quarter is certain, i.e., 100 percent; 0 means there is no chance at all, i.e., 0 percent).

	Probability (out of 100) of decline in real GDP:
Q4 2009 to Q1 2010	
Q1 2010 to Q2 2010	
Q2 2010 to Q3 2010	
Q3 2010 to Q4 2010

b. The PCE inflation rate?	

Next 10 Years: 2010 to 2019 [Please be consistent with your annual projections in Section 3]

What do you expect to be the annual average over the next 10 years -- 2010-2019:

c. The CPI inflation rate?	
d. The PCE inflation rate?	
e. Real GDP growth rate (chain-weighted basis)?
