NPSAV – Nominal Personal Saving

1. Seasonally adjusted, annual rate, billions of dollars.

2. First Vintage: 1965:Q4

3. First Observation: 1947:Q1

4. High-Frequency Source: BEA’s *Survey of Current Business*

6. Vintage Names: NPSAVyyQq, where yy is the year of the vintage (two digits), Q represents the word quarter, and q is the quarter of the vintage (one digit).

7. Vintage Dates: Quarterly vintages reflect the data available in the middle of the quarter. This corresponds to the advance report of the U.S. Bureau of Economic Analysis.

**Special Notes**

1. In its annual revision of 2002, the BEA announced a methodological change in the way that it would revise future estimates of wages and salaries. The change affects the way in which our real-time data for personal saving, disposable personal income, and personal income are revised. In moving from one of our quarterly vintages to the next, the BEA will now provide revisions to the last two quarterly observations, rather than just the last one. For more information on this change, see the article by Eugene P. Seskin and Stephanie H. McCulla, “Annual Revision of the National Income and Product Accounts,” *Survey of Current Business* (August 2002), pp. 7-34.

2. **NPSAV66Q1 – Unusual Revision.** This vintage includes a revision to the observations for 1965:Q1 – 1965:Q2.

3. **NPSAV69Q4 – Unusual Revision.** This vintage includes a revision to the observation for 1969:Q1.

4. **NPSAV71Q4 – Unusual Revision.** This vintage includes a revision to the observation for 1971:Q1.

5. **NPSAV72Q1 – Unusual Revision.** This vintage includes a revision to the observations for 1971:Q1 – 1971:Q2.
6. **NPSAV82Q3 – Extended Annual Revision.** The annual revision in this vintage affects observations starting from 1977:Q1.

7. **NPSAV92Q1 to NPSAV92Q4 – Missing Observations.** In these vintages, observations are available starting only from 1959:Q1 because data prior to 1959:Q1 were not reported in our deep-history source.

8. **NPSAV92Q2 – BEA Correction.** This vintage incorporates corrections to the data covering the period 1959:Q1 to 1990:Q4 originally published by the BEA. The corrections were published in the February 1992 *Survey of Current Business*. Subsequent vintages reflect the correction, but previous vintages do not. In addition, unusual revisions covering the period 1990:Q4 to 1991:Q3 appeared in the April 1992 *Survey of Current Business*.

9. **NPSAV96Q1 – Missing Last Observation.** In this vintage, the last observation (1995:Q4) is missing because of delays in the release of official data caused by the federal government shutdown.

10. **NPSAV96Q1 to NPSAV97Q1 – Missing Observations.** In these vintages, observations are available starting only from 1959:Q1 because data prior to 1959:Q1 were not reported in our deep-history source.

11. **NPSAV97Q3 – Extended Annual Revision.** The annual revision in this vintage affects observations starting from 1993:Q1.

12. **NPSAV98Q3 – Extended Annual Revision.** The annual revision in this vintage affects observations starting from 1982:Q1.

13. **NPSAV99Q4 – Missing Observations.** In these vintages, observations are available starting only from 1994:Q1 because data prior to 1994:Q1 were not reported in our deep-history source.

14. **NPSAV00Q1 – Missing Observations.** In these vintages, observations are available starting only from 1959:Q1 because data prior to 1959:Q1 were not reported in our deep-history source.

15. **NPSAV11Q3 – Flexible Annual Revision.** On July 29, 2011, the BEA released a flexible annual revision to the national income and product accounts. Flexible annual revisions may affect more observations than those of the past three years. In addition, flexible annual revisions can incorporate methodological changes to the way in which the BEA constructs the data in the national accounts.
